### **DETAILED ACTION**

## Claim Objections

1. Claims 18-19 are objected to because of the following informalities: in line 6 in each of claims 18-19, it appears that "roll presses" should actually be --roll pressers-- as this is what is disclosed in the specification (page 9, lines 3-5). Appropriate correction is required.

# Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claim 17 is rejected under 35 U.S.C. 102(b) as being anticipated by Nozawa (JP 06-191738).

Nozawa discloses a paper spool 1b having a roll-like paper 3 wound around the spool 1b and a notch 1a that could be used for rotation detection formed on at least one interior end of the paper spool 1b. Figure 6 of Nozawa shows that the spool 1b does not extend past the width of the paper 3.

#### Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Application/Control Number: 10/809,558 Page 3

Art Unit: 2854

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Carlino et al. (US 1,241,193) in view of Kelch et al. (US 3,905,561).

Carlino et al. discloses the claimed paper spool and support apparatus except for the printing paper roll pressers and that it is not known to the examiner if spool does not extend past the width of the paper wound around the spool 7. Carlino et al. discloses a paper spool 7 having a notch 8 that could be used for detecting rotation. In lines 14-18, Carlino et al. discloses that paper is wound around the core (spools). Further disclosed by Carlino et al. are bushings 9 for rotatably supporting the paper spool 7. Kelch et al. discloses printing paper roll presses 1 that rotatably support a spool 5 as shown in Figure 1 of Kelch et al. Additionally, in Figure 1 Kelch et al. shows that the spool 5 does not extend past the width of the paper 7. It would have been obvious to combine the teaching of Kelch et al. with the paper spool and support apparatus disclosed by Carlino et al. for the advantage of protecting the end portions of the paper wound on the spool and for guiding the edges of the paper during winding or unwinding of the spool (Kelch et al., col. 1, lines 7-18).

#### Allowable Subject Matter

6. Claim 19 is objected to for containing the above mentioned informality but would be allowable if rewritten to overcome this informality.

Art Unit: 2854

7. The following is a statement of reasons for the indication of allowable subject matter:

Claim 19 has been indicated as containing allowable subject matter primarily for the rotation detection notch formed in a spool wherein the spool does not extend past the width of the paper and the rotation detector that detects the notch.

### Response to Arguments

- 8. Applicant's arguments with respect to claims 17-18 have been considered but are moot in view of the new ground(s) of rejection.
- 9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Art Unit: 2854

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dan Colilla whose telephone number is (571) 272-2157. The examiner can normally be reached Mon.-Thur. between 7:30 am and 5:00 pm. Faxes regarding this application can be sent to (703) 872-9306.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Hirshfeld can be reached at (571) 272-2168. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <a href="http://pair-direct.uspto.gov">http://pair-direct.uspto.gov</a>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
